

Classroom Corner

Beginner B

Ms. Carolyn & Ms. Celeste

The Beginner B class had so much fun this month! The children celebrated birthdays, had friends potty trained and enjoyed the sunny weather. The students were also able to enjoy seeing zoo animals and watching a puppet show.

This month your child will be introduced to new skills such as speaks in a clear audible voice, understanding big vs. little and fast vs. slow. The students will also review skills like counting 1-20 and holding a crayon or other writing utensils correctly. The children will be learning so much this month.

Remember school is closed August 14th. Also we hope to see you at Back to School Night Wednesday, August 19th from 5:30pm to 6:30pm. This is a wonderful opportunity to meet teachers and learn all about what is going on in your child's class.

Intermediates

Ms. Daleana

Through the month of July the children have experienced their world with heavy emphasis on science and engineering. We have been discussing why and how events affect each other. For example, we were fascinated with our sunscreen experiment. Our test paper burned without sunscreen but stayed moisturized when sunscreen was applied.

We will be thinking in the same manner this month while also including aspects of math and technology. One of our featured themes will be animal habitats. The children will conduct experiments to understand why the fur of polar bear keeps him warm in the tundra. Hmmm I wonder how many bears live in one cave? Maybe you could research this at home and your child can share with the class what was found out.

As a side note, now that we are comfortable in our new classroom be sure to check your child's cubby for several sets of clean clothing to be used in case of an extra messy day. Along the same lines, our classroom in in need of extra clothing (shirts, pants and undergarments) for both boys and girls and would be very thankful for any donations. Happy Birthday to Kenna, Lucas and Harsh!!

Pre-K

Ms. Angie & Ms. Hayley

What an amazing month we had getting to know new friends and learning new classroom rules. We had fun going to the circus with shapes, camping with new animals and counting everything in our path.

This month we will be going to the ocean and exploring our five senses at the beach. We will also be exploring and mixing colors to find out what will happen. We will be making a zoo and counting all of the animals so no one gets lost. We will also be introducing new rhyming words.

We will be celebrating Austin, Xylia and Ms. Hayley's birthdays. If you can donate plastic ocean or zoo animals to the class we would be very thankful.

Pre-K 2

Ms. Judy & Ms. Desiree

We made it through July without melting all the way! The heat did not stop us from camping and making s'mores. We had some great weather where we visited the ocean in Hawaii to explore shells and ocean animals. We cooled off with some ice cream fun and explored rain forest animals.

With August upon us we will start off by exploring shapes we would see at a circus. Next, we will be daring and count crocodiles. We will continue on as we weather the seasons and explore opposites hot and cold. We will end August as we walk on our wild side exploring zoo animals. We will work on the concept of more than, less than and equal to. We will continue to recognize letters and letter sound relationships.

Please bring in a family photo for us to use to create our own classroom family tree. sight words and a bonus word that they can read/recognize. We will be having an ice cream party for them the second week of June for their hard work with their sight words. We voted on the toppings and we will let you know the exact date so that if it is a day your child is not in school, you can bring them in to join us!
