

Classroom Corner

This section is written by our amazing Merryhill teachers.
It is a place for you to find specific information about your child's classroom.

Infants

Ms. Amber, Ms. Jen, Ms. Michele & Ms. Jessica

We are so excited to start off the summer with all the babies. We have a lot of fun activities planned so you will not want to miss out on any of it.

In July, we are going to be learning all about the beach and we will also be letting the babies be artists. One activity we will be doing with the babies is painting with a starfish. The babies will get to explore different textures during this activity. Another fun activity we have planned for the babies is making sculptures with play dough. We cannot wait to see what the babies think about having the play dough between their fingers!

Toddler A

Ms. Lala & Ms. Makenna

Happy new school year! Good luck to those that moved up and welcome to Marlow, Kairi, Harrison, Augustine and their families. It will be fun to watch the children grow. During the month of July we will “rea” books and sing songs that we can listen to loud and clear. Plus, we will make sound shaker out of empty plastic bottles. Then we will make squishy “sensory bags” with googly eyes or oil and water or paint ...you name it!! Did you know babies cannot differentiate between nice smells and stinky ones until they reach toilet-training age? We will take your baby on a “sniff-tour” of her world: flowers, soaps, baby food ... and last but not least we will taste banana and yogurt. Yummy! We cannot wait for July. Please, for the new parents, make sure you bring in some sunscreen and fill out the form if you have not done so.

Toddler B

Ms. Karin & Ms. Lilia

We are so excited to welcome our new friends to the Toddler B class. We are looking forward to getting to know all of the families. The older toddlers are already showing our new friends the routines and what to do in the classroom. Ms. Karin is excited to welcome Ms. Lilia to our class. Please take a moment to say “Hi!” to Ms. Lilia. This summer will be all about “STEAM” (Science, Technology, Engineering, Art and Math.) The children will experience many opportunities to problem solve and follow their curiosity through open ended activities. Toddlers will imitate words and through their own investigations they will build their vocabularies. While mixing colors the children will be excited to learn the names of the color they make and point to the colors named by the teachers. Toddlers are naturally curious and that curiosity fuels their learning.

If you have not yet, please check your toddler’s cubby for extra clothes (weather and size appropriate) and anything needing to go home from their previous class. If you have any questions please do not hesitate to ask. It is going to be a great year!

Beginner A

Ms. Elizabeth & Ms. Jacquie

Welcome to Beginner A! We have been enjoying getting to know the children and their families. We are also excited to get to know each of you even more throughout the year. This past week we have been introducing summer time to the children and what we do during summer time. July brings more exciting activities. We will be working on many STEAM (Science, Technology, Engineering, Art and Math) activities. For example we will be learning about numbers, solar energy, liquids and much more! We will be working on expanding vocabulary, repeating and understanding numbers. We are going to be getting messy with some of the activities. Please bring extra clothes just in case. It is also very hot and we want to keep everyone hydrated. If you would like you may bring a sippy cup for your child. We look forward to all of the fun we will be having this month.
