

Classroom Corner

Beginner B

Ms. Carolyn & Ms. Celeste

What a fun and exciting time for the Beginner B class. The two-year-olds are really getting into the swing of our school routine and we are gearing up for fall. We are excited to introduce new skills this month. The children will be encouraged to call teachers by name and recognize friends and family in photographs. We are excited to see the children excel this year! **Please join us for our Grandparent's Day celebration Friday, September 11th at 3:30 for an Ice Cream Social.** In addition, if you could please provide a white 1inch three-ringed binder for your child's portfolio, it would be greatly appreciated ☺ Thank you

Intermediates

Ms. Daleana

Whew! We had a busy summer and start to the school year with new friends in the Intermediate class. We wrapped up August with a Mad Science theme. The students learned to make predictions about what may happen when an egg is dropped. In September we plan to learn about pets. Do you have pets at home? We will get to know each other better by finding out what our classmates' favorite colors are and where we can find those colors in nature and in our classroom. Happy birthday Fiona and congratulations to the Aleksich family, we cannot wait to meet baby Victoria! Please mark your calendar for **Grandparent's Day** and come celebrate with an Ice Cream Social on **September 11th.**

Pre-K

Ms. Angie & Ms. Hayley

We ended our summer with learning about the ocean and different animals from all over the world that can be found at the zoo. During our camping theme, students made a map of a camp ground and voted for their favorite ice cream. In September, we will hone in on proper hand grip (pincer grasp) when writing letters and numbers. We will also be recognizing numbers 1-10 and will practice writing our first name. During lunch the children begin helping pour their own milk from a small pitcher. This month we also look forward to learning about healthy habits, farms and Johnny Appleseed. **Grandparents Ice Cream Social on Friday, September 11th at 3:30. We invite all grandparents to join!**

Pre-K 2

Ms. Judy & Ms. Desiree

August found us being silly with shapes and clowns at the circus. We counted crocodiles with a monkey and weathered the seasons as we learned about snow blizzards, rains storms, tornadoes and then windy weather. Our summer came to an end while having fun with zoo animals. September puts us in full swing of school mode! We plan to start off learning about the ABC's at School then will move on to the life cycles of animals and plants. We will then have fun with farm animals and the adventures of a mischievous pig. We will celebrate Johnny Appleseed's birthday with apples and then end our month reviewing Links to Learning skills. Throughout the month we will continue to work on identifying letters and letter/sound relationships, as well as recognizing numerals 1-50. We will also continue to work on rhyming words, opposites and using adjectives to describe people and objects. **Please join us on Friday September 11th for an Ice Cream Social in celebration of Grandparent's Day!**
