

MRS
WALKER

Summer is often a time when students lose sight of skills they have learned throughout the school year. Ongoing standard-based practice increases students' ability to retain concepts, enhances their performance, and prepares them for the next grade level. My sincere purpose is to help each student reach his/her full potential, build a strong academic foundation, close any previous learning gaps, and develop confidence in math and language arts. These summer activities are an intentional step towards strengthening our students for future success.

I have attached a suggested "Summer Reading" literature study with several extension tasks.

I have also attached a "Math 6/Pre-Algebra" packet with additional resources to help with any confusing concepts. **Kahn Academy** is an amazing resource which helps greatly with proficiencies.

Have a fabulous and productive summer,
Ms. Walker
