CLASS CONNECTIONS

LOOKING BACK: OUR WEEK IN REVIEW

- In language arts this week, we read the play Two Bear Cubs. The students identified the theme of the play and compared it to the theme of the other plays that we have read.
- In math this week, the students completed our unit on area. They practiced using the distributive property to find the area of rectangles. They also practiced finding the area of irregular figures by splitting them into smaller rectangles.
- The students began a unit on weather and climate. They used maps to create graphs of the average temperature and precipitation in several major cities.

LOOKING AHEAD: COMING UP!

- On Monday we will be heading to the B Street Theater! Students will need to bring a morning snack with them.
- In math next week, students will use their knowledge of finding area to design North Pole!
- In science next week, we will continue our study of weather and climate. The students will use data to create their own weather forecasts.
